Simón Franco

FRONTEND DEVELOPER

I am a passionate Software Engineer with 5+ years of experience in software development. I am proficient in a variety of programming languages and software development frameworks. I am a highly motivated and results-oriented individual with a proven track record of success. I am always looking for new challenges and opportunities to learn and grow.

I am committed to making a positive impact on the companies I work for, the people I collaborate with, and society as a whole.

Unisabaneta

WORK EXPERIENCE

NOVEMBER 2018 · PRESENT
Fullstack Web Developer
Freelance

As a Freelance Web Developer, I have successfully built and deployed dynamic and interactive web applications using a range of technologies. With a focus on front-end development, I have leveraged JavaScript and modern frameworks such as React, Next.js, and Angular to create engaging user interfaces and seamless user experiences. On the Backend, I have utilized Node.js and Express to design robust server-side components, RESTful APIs, and database integrations, ensuring optimal functionality and data management.

Projects

Implementation and support
Snow Dental 2021 · Present

Implementation and support
Funias 2022 · Present

JUNE 2014 · NOVEMBER 2018
